

Release Notes

Release 19.1.7107.20061 M 6/17/19

FirePrograms functionality changes and enhancements:

- Multi-Assign actions entry modified when editing or deleting actions:
 - "Add" no longer allows unchecking previously selected values. To remove a value the user should use the "Delete" button
 - "Edit" no longer presents the multi-select option. The user will be editing **ONLY** the row they are currently focused on.

The goal of these changes is to make it more intuitive to the user what they are actually doing. "Multi-Add" is now just that, **ADDING**. if they want to delete, or edit, they still do that on a row by row basis.

- The Training Class Session form now opens when you drop a class onto the Training calendar in Month, Week and Day views.
