

Release Notes

Release 19.4.7325 1/23/20

FirePrograms functionality changes and enhancements:

- Personnel Activity Records (browser and reports) now use the **Alarm Time** from the Incident Exposure for the **start time** of the activity by default.
 - For personnel that were not the first responders, their recorded arrival time is still used.
- Only certain file types can now be uploaded as attachments: Image and video files, standard Office files such as word and excel for example and .PDFs are currently whitelisted. Maximum file size is 5MB.
