

Release Notes

Release 19.4.7447M 5/26/20

FirePrograms functionality changes and enhancements:

- Dictionary entries now visually sort by “Summary Description” by default.
- Training Class list is now pinned by default when loading the training calendar
- The Class Session can be edited if it is blank when the form is opened.
- When creating a Training Class Session from the calendar, the date no longer uses the default start and end times.
- Class Session, Start time and End time are now required fields before saving a Class Session.
- EMS Patient times now default to the incident date.
